

Akron Regional Air Quality Management District Compliance & Technical Assistance Program

A Non Regulatory Program to Help Smaller Facilities with
Air Regulatory/Permitting Compliance

HELP!

Environmental regulations are not the easiest to navigate. How do you know for sure if your business even needs an air permit? No one wants to operate their business without the proper permits, but sometimes it's confusing and downright overwhelming. That's where our Compliance & Technical Assistance Program or CTAP can help.

Businesses/facilities located in Medina, Summit or Portage counties now have a new place to go for assistance. The CTAP program is focused on the air permitting needs of our 3 county service area alone, and mirrors much of the work that the Ohio EPA's Office Compliance and Pollution Prevention (OCAPP) program does, only with a local contact and air permitting specific scope.

Who Can Use This Service?

Short answer...basically any *non Title-V* facility located in Medina, Summit or Portage counties. Existing businesses and/or start-ups are encouraged to take advantage of the **FREE** service.

Concern:	Should I Contact CTAP?
I want to start a new business.	✓
We're going to start manufacturing a new product.	✓
We heard this new material will be more cost effective to use.	✓
I'm acquiring an existing facility in your region.	✓
Our equipment needs repaired/replaced.	✓
I need to renew my permit.	✓
How do I fill out this application?	✓

Common Businesses that May Need Air Permits

Asphalt Plants ⊙ Auto body shops ⊙ Crematories ⊙ Dry Cleaners ⊙ Concrete Plants ⊙ Foundries
Furniture Manufacturing ⊙ Metal Finishing/Plating ⊙ Printing ⊙ Sand & Gravel Plants

Free...Confidential...Flexible

Our CTAP staff will be located in a separate area of our offices to ensure confidentiality for our clients. Staff can come to your facility, host a meeting at our location, review documents electronically, do a site visit, and take phone consultations.
