

# Monthly Communicable Disease Report Summit County February, 2023

---

---

## Monthly Highlights/Observations:

**1. Tuberculosis-** 1 new suspected case of TB was reported in February and 4 contacts from current and previous cases continue to be investigated. In addition, the program remains open to continue the tuberculosis screening process for up to 150 refugees, in collaboration with other agencies and healthcare providers. SCPH CDU currently provides direct observed therapy (DOT) to 3 cases. Additionally, one DOT case was opened in February and none were closed. DOT clients receive daily to monthly visits via video calls depending on side effects and where the client is in treatment. All cases are complex, which requires collaboration and coordination between multiple agencies and external community services.

The Communicable Disease Unit investigated 73 communicable disease cases in February: 24 cases of Hepatitis B - Chronic, 9 cases of CP-CRE, 7 cases of Lyme, 4 cases of Giardia, 4 cases of Salmonella, 3 cases of Campylobacter, 3 cases of Cryptosporidiosis, 3 cases of Varicella, 2 cases of Coccidioidomycosis, 2 cases of E. Coli, 2 cases of Hepatitis A, 2 cases of Streptococcal - Group A, 2 cases of Streptococcus pneumoniae, and one case each of Amebiasis, Hepatitis C - Perinatal, Legionella, Measles, Pertussis and Streptococcal - Group B in newborn. Note: Since some reported cases end up being classified as "Not a Case" in ODRS or the case may have been previously reported, the investigation case totals may vary compared to the counts in the table.

**2. Outbreaks:** 10 COVID-19 outbreaks were identified by the CDU in February, occurring in school and long-term care settings. 4 non-COVID-19 outbreaks were investigated in February.

**COVID-19:** There were 1,811 confirmed or probable cases of COVID-19 reported in Summit County in February. COVID-19 information, a weekly COVID-19 report, and a dashboard with data for Summit County can be accessed here: <https://www.scph.org/covid>

**3. Epicenter:** Epicenter is an electronic surveillance system which provides instant notification of unusual symptomatic activity at local Emergency Departments. 12 Epicenter alerts were issued during February: Diarrhea - Not Watery/Bloody (5), Ear, Nose, Throat (2), Cough (2), Class A Measles indigenous (1), Class A Neisseria meningitidis (1) and Vomiting (1)

**4. Influenza Surveillance:** Surveillance for the 2022-2023 influenza season resumed on October 2, 2022; The first report was issued on October 21, 2022. Data from previous influenza seasons are available in an influenza dashboard, which is located on the SCPH website: <https://www.scph.org/dashboards> Weekly influenza reports for the 2022-23 season and previous seasons may be accessed here: <https://www.scph.org/flu-surveillance-reports>

**5. Vector-borne Surveillance:** Vector borne surveillance concluded on October 23, 2022 and the first report was issued in mid-June. Copies of the reports for 2022 and previous years may be accessed at: <https://www.scph.org/vector-surveillance-reports>

## Communicable Disease Reports Received, February 2023

Reportable Condition	February 2023	January 2023	Year-to-Date 2023	Year-to-Date 2022
Amebiasis	1	0	1	3
Babesiosis	0	0	0	0
Botulism - infant	0	0	0	0
Botulism, food borne	0	0	0	0
Brucellosis	0	0	0	0
C. auris	0	0	0	0
COVID-19	1,811	1,740	3,551	19,968
CP-CRE	9	4	13	3
Campylobacteriosis	3	5	8	12
Chikungunya virus	0	0	0	0
Chlamydia infection	218	258	476	472
Cholera	0	0	0	0
Coccidioidomycosis	2	0	2	0
Creutzfeld-Jakob Disease	0	0	0	0
Cryptosporidiosis	3	0	3	4
Cyclosporiasis	0	0	0	0
Dengue	0	0	0	0
<i>E. coli</i> , Shiga Toxin-Producing (O157:H7, Not O157, Unknown Serotype)	2	1	3	4
Ehrlichiosis/ anaplasmosis	0	0	0	0
Giardiasis	7	2	9	22
Gonococcal infection	99	125	224	288
<i>Haemophilus influenzae</i> infection	0	1	1	0
Hantavirus infection	0	0	0	0
Hemolytic uremic syndrome (HUS)	0	0	0	0
Hepatitis A	2	0	2	2
Hepatitis B - acute	0	0	0	3
Hepatitis B - chronic	9	9	18	23
Hepatitis B - perinatal (see Notes on page 3)	0	0	0	1
Hepatitis C- acute	0	0	0	0
Hepatitis C- chronic	33	37	70	71
Hepatitis C - perinatal infection	0	1	1	0
Hepatitis E	0	0	0	0
HIV/AIDS	3	0	3	9
Influenza - ODH Lab Results	2	3	5	3
Influenza-associated hospitalization	5	31	36	5
Influenza-associated pediatric mortality	0	0	0	0
LaCrosse virus disease	0	0	0	0
Legionellosis	1	1	2	3
Listeriosis	0	0	0	1
Lyme Disease	4	2	6	4
MIS-C associated with COVID-19	0	0	0	7
Malaria	0	1	1	0
MERS	0	0	0	0
Measles	0	0	0	0

## Communicable Disease Reports Received, February 2023

Reportable Condition	February 2023	January 2023	Year-to-Date 2023	Year-to-Date 2022
Meningitis - aseptic/viral	0	1	1	0
Meningitis-bacterial (Not N. meningitidis)	0	0	0	0
Meningococcal disease- <i>Neisseria meningitidis</i>	0	0	0	0
Mpox (confirmed and probable)	0	0	0	0
Mumps	0	0	0	0
Pertussis	1	1	2	2
Powassan virus disease	0	0	0	0
Psittacosis	0	0	0	0
Q Fever	0	0	0	0
Rubella	0	0	0	0
<i>Salmonella typhi</i>	0	0	0	1
Salmonellosis	4	2	6	3
Shigellosis	0	0	0	1
Spotted fever rickettsiosis, including RMSF	0	0	0	0
<i>Staphylococcal aureus</i> - intermediate resistance to vancomycin (VISA)	0	0	0	0
Streptococcal - Group A invasive	1	7	8	4
Streptococcal - Group B in newborn	1	0	1	2
Streptococcal toxic shock syndrome (STSS)	0	0	0	0
<i>Streptococcus pneumoniae</i> - invasive - unknown resistance	1	4	5	6
<i>Streptococcus pneumoniae</i> - invasive - resistant	1	2	3	2
Syphilis - all stages	32	32	64	48
Syphilis - Congenital	1	1	2	NR
Toxic Shock Syndrome (TSS)	0	0	0	0
Trichinellosis	0	0	0	0
Tuberculosis	1	1	2	1
Tularemia	0	0	0	0
Typhoid fever	0	0	0	0
Varicella	1	1	2	1
Vibriosis (not cholera)	0	0	0	1
West Nile virus infection	0	0	0	0
Yersiniosis	0	2	2	1
Zika virus infection	0	0	0	0
<b>Total</b>	<b>2,258</b>	<b>2,275</b>	<b>4,533</b>	<b>20,982</b>

### Notes:

1) This report includes the number of reports of disease received and investigated by Summit County Public Health (SCPH). **This includes all reports that were determined to be probable, suspected, or confirmed.** Based on case investigation, clinical diagnoses, IDCM case definitions, and lab results, the case status may change. NR = not reported in previous year.

2) The Total Year-to-Date column reflects all cases of disease where SCPH is identified as the local health department in the Ohio Disease Reporting System (ODRS) as of the date that data was extracted. This includes the cases of disease entered into ODRS after last month's report was generated which will now be included in the Previous Month Revised column. Data may also vary in response to recent changes in data extraction and analysis. **Because case classifications can change over time, monthly figures should not be considered final until the annual report is complete.**

3) The number of perinatal hepatitis B cases reflect the number of infants born to hepatitis B positive mothers during the reporting period. These infants will be followed by the Perinatal Hepatitis B Prevention Program (PHBPP) until serology indicates that the child has immunity.

*For questions or comments about this report, please contact the Communicable Disease Unit at (330) 375-2662. This report was issued on March 6, 2023.*
