

# Monthly Communicable Disease Report Summit County November, 2023

---

---

## Monthly Highlights/Observations:

**1. Tuberculosis-** Two confirmed cases of TB were reported in November and 38 contacts from current and previous cases continue to be investigated. In addition, the program remains open to continue the tuberculosis screening process in collaboration with other agencies and healthcare providers. SCPH CDU currently provides direct observed therapy (DOT) to 11 cases. One DOT case was closed in November. DOT clients receive daily to monthly visits via video calls depending on side effects and where the client is in treatment. All cases are complex, which requires collaboration and coordination between multiple agencies and external community services.

The Communicable Disease Unit investigated 90 communicable disease cases in November: 22 cases of Hepatitis B - Chronic, 8 cases of Campylobacteriosis, 7 cases of CPO-*Acinetobacter*, 7 cases of Varicella, 6 cases of CPO-*Enterobacter*, 5 cases of Lyme disease, 4 cases of *E. Coli*, 4 cases of Hepatitis A, 4 cases of legionellosis, 3 cases of CPO-*Pseudomonas*, 3 cases of Giardiasis, 2 cases each of *C. Auris* Colonization screening, Salmonellosis, *Haemophilus influenzae*, *Strep pneumoniae*, and 1 case each of CP-CRE (ODH unable to isolate), CPO- Colonization Screening *Acinetobacter*, Hepatitis B - Acute, Meningitis- bacterial, Meningitis - aseptic, pertussis and yersiniosis. Note: Since some reported cases end up being classified as "Not a Case" in ODRS or the case may have been previously reported, the investigation case totals may vary compared to the counts in the table.

**2. Outbreaks:** 4 new COVID-19 outbreaks were identified by the CDU in November. 3 non-COVID-19 outbreaks were investigated in November. 8 additional COVID-19 outbreaks remain open and investigation will continue until no new cases are reported. All of the current COVID-19 outbreaks are occurring in Long Term Care Facilities.

**COVID-19:** There were 1,662 confirmed or probable cases of COVID-19 reported in Summit County in November. COVID-19 information can be accessed here: <https://www.scph.org/covid>

**3. Epicenter:** Epicenter is an electronic surveillance system which provides instant notification of unusual symptomatic activity at local Emergency Departments. 10 Epicenter alerts were issued during November: Cough (5), Eyes (3), and Respiratory (2).

**4. Influenza Surveillance:** Surveillance for the 2023-2024 season resumed on October 1, 2023. Reports will be available on a weekly basis. Reports from current and previous influenza seasons are available on the SCPH website: <https://www.scph.org/flu-surveillance-reports>

**5. Vector-borne Surveillance:** Vector borne surveillance concluded for the season on October 21, 2023 and reports for 2023 are available. Copies of the reports for 2023 and previous years may be accessed at: <https://www.scph.org/vector-surveillance-reports>

**Notes:**

- 1) This report includes the number of reports of disease received and investigated by Summit County Public Health (SCPH). This includes all reports that were determined to be probable, suspected, or confirmed. Based on case investigation, clinical diagnoses, IDCM case definitions, and lab results, the case status may change. NR = not reported in previous year.
- 2) The Total Year-to-Date column reflects all cases of disease where SCPH is identified as the local health department in the Ohio Disease Reporting System (ODRS) as of the date that data was extracted. This includes the cases of disease entered into ODRS after last month's report was generated which will now be included in the Previous Month Revised column. Data may also vary in response to recent changes in data extraction and analysis. Because case classifications can change over time, monthly figures should not be considered final until the annual report is complete.
- 3) The number of perinatal hepatitis B cases reflect the number of infants born to hepatitis B positive mothers during the reporting period. These infants will be followed by the Perinatal Hepatitis B Prevention Program (PHBPP) until serology indicates that the child has immunity.

For questions or comments about this report, please contact the Communicable Disease Unit at (330) 375-2662. This report was issued on December 7, 2023.
